Press Release – Development Services

October 1, 2020

As part of an ongoing effort to find efficiencies and savings for Town operations, please be advised that effective immediately, the Town will be using a contracted service provided by Municipal Planning Services (MPS), who currently provides planning assistance to the Town.

Moving forward, development permits are available online in a pdf-fillable format, or from the office. Please send these forms to devofficer@redwater.ca. Enquiries can be sent by email or by telephone or to book an appointment to meet with an MPS representative. MPS will be available at the Town office every Monday to meet with prospective applicants and answer questions. Safety Codes permitting, which includes building, electrical, plumbing and heating will continue to be provided by the Inspections Group.

Such a change will result in significant financial savings for the Town, while having knowledgeable personnel available to assist you.

For further details, please contact Larry Davidson, Town Manager @ cao@redwater.ca or 780-942-3519 ext. 230.

Respectfully,

Larry Davidson
Town Manager
